

TOOLBOX TALKS

The Upside of Safety

COVID-19 Job Site Controls

Social Distancing

A 6 foot distance should be maintained between you and your co-workers, unless involved in a task that requires more than 1 person (ie. lifting material). If feasible, only 1 person should be in a vehicle when driving to and from a jobsite.

Sanitation and Hygiene

Disinfectant wipes and/or cleaning products should be readily available for workers to be able to wipe down tools and equipment before and after use.

Steps to disinfecting:

- Wipe down tools or equipment in frequently touched areas (controls, steering wheels, handles, etc.)
- Use tool or equipment
- When finished, wipe down frequently touched surfaces again

Hand sanitizer should be available for workers to be able to frequently wash their hands. It is recommended to wash your hands at least once per hour.

Face Masks

Most clients, contractors, and state's are requiring face masks to be worn at all times per the CDC (unless an unsafe condition exists).

Other Controls

- Designate a Pandemic Safety Officer for each job site location.
 - This person is responsible for ensuring that all of the COVID-19 controls are in place and supplies are available
- **DON'T COME TO WORK IF YOU ARE SICK**
- Be prepared to have your temperature taken.
 - Some job sites/clients might require it
 - Required if you have a worker test positive for COVID-19
- Limit groups/meetings (toolbox talks) to less than 10 people and promote social distancing

TOOLBOX TALKS

The Upside of Safety

✓ SAFETY CHECK

All workers are wearing a face mask (if an unsafe condition doesn't exist)?

Workers are maintaining a 6 feet of social distancing?

A Pandemic Safety Officer is designated for the site?

The site has an adequate supply of cleaning products and disinfectant wipes?
